Lithuania, Kaunas

Summary

Results-oriented Frontend Developer with extensive experience in Vue 3, React, and TypeScript. Proven track record of collaborating with international teams to engineer high-performance, scalable web applications and AI-augmented development workflows.

Expert in SEO optimization and clean architecture, successfully improving page speeds by 300% and achieving perfect Lighthouse scores.

Highly adaptable professional with a background in disciplined, high-pressure environments.

Experience

Web Developer

Nov 2023 - Dec 2025

BitDegree

- **Frontend Engineering:** Developed and maintained modern frontend applications using Vue.js, React.js, TypeScript, JavaScript, HTML5, and SCSS, Bootstrap.
- **Cross-Functional Collaboration:** Partnered with international engineering, product, and design teams in Agile workflows to deliver high-performance interfaces.
- **Full-Stack Synergy:** Integrated frontend components with PHP/Laravel backend systems and RESTful APIs to ensure data integrity and smooth user journeys.
- **AI-Driven Productivity:** Expertly utilized AI-integrated development environments (IDEs) and AI-driven tools to accelerate coding workflows, refactor legacy code, and optimize frontend features.
- **Performance & SEO:** Engineered critical optimizations that increased page speed by 3x and secured a 100 Lighthouse SEO score, significantly boosting search visibility and user retention.
- **DevOps & Quality:** Actively participated in CI/CD pipelines, Git-based version control, and rigorous code reviews to maintain high code quality standards.

Mandatory Military Service

Dec 2024 - Aug 2025

- Developed advanced skills in teamwork, leadership, and crisis management while operating in high-pressure, structured environments.
- Applied rigorous discipline and time management to meet demanding objectives, traits directly translated to efficient professional engineering workflows.

Education
